-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 29 September 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

- The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).
2. Claims 1- rejected under 35 U.S.C. 102(e) as being anticipated by Northcutt et al (US 20050070241 A1).

As per **claim 1**, Northcutt discloses a mobile phone that provides optical signaling synchronized with a selected ringtone (para. 2, abstract). The lighting is controlled (inherently via a control signal) such that the lights are sequenced according to a

chronological sequence of tones (the sequence of signal amplitudes of the ringtone) (para. 35).

As per **claim 2**, it is rejected as per the claim 1 rejection.

*Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 3 rejected under 35 U.S.C. 103(a) as being unpatentable over Northcutt et al (US 20050070241 A1) as applied to claim 1.

As per **claims 3,9**, **Northcutt** discloses the synchronized lighting but does not disclose hysteresis used in creating the control signal.

It would have been obvious to one skilled in the art that hysteresis could be used on any detecting portions for the advantages inherent to hysteresis (immunity to transient noise).

As per **claim 4**, it would have been obvious to implement low pass filters in many places as a matter of design choice for the well known purpose of reducing high freq. Noise.

As per **claim 5**, the device comprises a dynamic detector (para. 37).

As per **claim 6**, it would have been obvious to use a well known shift register for the purpose of providing the buffering that is inherently required to synchronize the digital system.

As per **claim 8**, there are multiple lights arrange in order.

### ***Allowable Subject Matter***

**Claim 7** objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
